

## New resources and ideas at the Transnational Project meeting in Ljubljana!

Welcome, we take you on a tour of all our latest activities.

The **Arphymedes Plus project** is in its most intense central phase, the drafting of the first versions of the **E-Student book**, thanks to the feedback and **group work** that took place during the 2-day **TPM** in **Ljubljana** from 03-04 April 2023.

Months of intensive work at a distance, an excellent response of **cooperation** and synergy from the consortium.

The comfortable lecture halls of the **Faculty of Education, University of Ljubljana** were the stage where the partners' activities took place and hosted our Transnational (**hybrid**) Meeting related to the ARphymedes Plus project.

We finally took the opportunity to **meet in person** (not only through screens), but some team members joined us through scheduled online meetings.

## What were the highlights?

Turning points for the ARphymedes Plus project, a new version of the multimedia **student book** is being prepared.

New support elements for the student book were discussed in order to make it more engaging and to ensure great support for SEN students and teachers.

Lively brainstorming allowed a careful analysis of possible critical issues, problems that might be encountered, and ideas were fielded to proceed with the development of resources and take the project in a flourishing direction. In fact, the implementation and preparation of a dictionary for each chapter was planned to provide more clarification and simplification of the content for expressive immediacy.

The duration of the videos was also determined as well as their identification, i.e. how many videos will be present for each chapter.

The preparation of additional support material - such as illustrated stories, cards - is planned.

Thanks to the great sense of **participation** and **collaboration**, we had a good time and worked hard side by side.

Greater intensity moved towards the **completion of e-book structure with intensive consultation with Viteco – unified form of all chapters for SEN.**

Other highlights of the meeting are listed here:

- brainstorming of activities and supporting material to be included in the SEN teacher's book with printable materials, including cards with animation triggers, worksheets for teachers, parents and carers.
- A tested chapter of the book prepared for the students and feedback from testing, experience and brainstorming was discussed.
- The realised and planned dissemination activities of the Plus project were discussed.
- preparation of conference material
- preparation of press releases (newspapers, radio, local TV...) Slovakia and Slovenia
- discussed and completed rollups with Diadrisis
- ARphymedes PLUS planning of all trainings with target groups and approximate times or dates
- preparation of materials, including publicity materials
- after the test period - comparison between the Orehek test and the Postupimská Košice test

**What's next?**

We would like to proceed and see the results of our **successful 2-day programme** soon so that we can proceed further to the next steps with harmony and cohesion.

It is always important to brainstorm together.

We look forward for our further activities and meetings

**Stay tuned for more information and news!**
