

ARphymedes Plus Shines at European Researchers' Night 2023

We are thrilled to share an exciting update on ARphymedes Plus! On September 29, 2023, we had the incredible opportunity to be a part of the prestigious European Researchers' Night, an annual event aimed at celebrating science and research across Europe.

European Researchers' Night - A Glimpse

European Researchers' Night, initiated by the European Commission in 2005, is a grand celebration of science and knowledge dissemination.

This magnificent event unites people and researchers in 300 cities across approximately 25 European countries.

The festival acts as a bridge between the public and the world of science, introducing the latest technologies and instruments.

The night is guided by passionate researchers and scientists who offer participants the chance to engage in experiments, competitions, quizzes, and captivating demonstrations.

ARphymedes Plus Steals the Show

We were delighted to represent our project in both Slovakia and Slovenia during the European Researchers' Night. Our focus, as always, was to improve physics education for pupils with special educational needs through the implementation of augmented reality (AR).

In Slovakia, our project took center stage at the Museum of Science Aurelium. This year's theme was "Water," and it brought together children, students, teachers, parents, and visitors to explore fascinating experiments with communicating vessels, Pascal's hedgehog, viscosity, and more. The highlight was the ARphymedes Plus AR application, which added an extra layer of excitement to the event.

We are incredibly proud of the positive response we received, and it's a testament to the importance of our work in making physics education accessible to all.

Thank you for your ongoing support and partnership. Together, we are making a difference.

**Stay tuned for more exciting updates from
ARphymedes Plus!**
